Education

Anurag University Jun 2020 – Jun 2024
B.Tech in Artificial Intelligence (GPA: 8.07) Hyderabad, India

Work Experience

Cognizant Oct 2024 – Present
Junior Software Engineer (Salesforce & Data Integration focus) Hyderabad, India

- Architected enterprise-grade solutions using **Java/Apex** logic and Spring Boot; optimized cross-platform performance and build automation to **reduce response latency by 45%**.
- Designed high-performance **Relational Data Models** and utilized **Advanced SOQL/SQL** for performance tuning; managed **1M+ transactions** while improving database throughput by 35%.
- Engineered secure **Identity Management** using **OAuth2** and Spring Security, ensuring compliance with Salesforce-standard security protocols for data privacy.
- Spearheaded **troubleshooting of complex, high-priority technical issues** in customer-facing environments, effectively advancing customer issues through multi-tasking and technical precision.
- Utilized **Salesforce Ranger** expertise to implement **Data Grounding** strategies, aligning backend architectures with **Salesforce Data Cloud** and **Agentforce** features.

Technical Skills

Salesforce Ecosystem: Salesforce Platform (Apex Specialist), LWC, SOQL/SOSL, Sales & Service Cloud, Data Cloud, Agentforce, Flows, Salesforce DX.

AI & Big Data: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, Snowflake, Redshift, Data Modeling.

Languages & Frameworks: Apex (Java-based), Python, JavaScript, SQL, Spring Boot, Angular, React, .NET.

DevOps & Tools: CI/CD (Git/GitHub), Maven, Azure, RESTful APIs, Performance Tuning, Unit Testing.

Projects

AI Transaction Detection & Data Grounding 2024
Python, NLP, Scikit-learn, Pandas

- Developed an ML model for automated transaction categorization, aligning with **Generative AI concepts** to improve data retrieval precision.
- Implemented **NLP-driven pipelines** that mirror **RAG architecture**, facilitating better "grounding" of data for accurate AI-driven diagnostics.

Agentforce AI Customer Utility 2024
Agentforce, Data Cloud, Prompt Engineering, Flow Builder

- Engineered an automated **Agentforce Assistant** to streamline customer support, utilizing **Retrieval-Augmented Generation (RAG)** for real-time data retrieval.
- Implemented **Data Grounding** by connecting the AI agent to **Data Cloud DMOs**, ensuring 95% accuracy in automated responses based on live customer history.
- Designed and tuned **AI Prompts** and custom **Apex Actions** to enable the agent to execute complex business logic within the Salesforce platform.

Learning Destiny – Relation-Based Platform 2023
Firebase, Angular, TypeScript

- Built a scalable education platform with real-time sync, demonstrating the ability to manage **Cross-Cloud Integrations** and complex user permissions.

Certifications & Leadership

- **Salesforce Trailblazer (Ranger Status):** Trailhead Profile — **Apex Specialist Superbadge** holder; expert in **Data Cloud** and **Agentforce Specialist** modules.
- **Technical Mentor at LearningDestiny Academy:** Guiding 50+ learners in **DSA** and Full-stack development, proving strong verbal/written communication and the ability to simplify complex technical issues.
